

ShoreTel Connect HYBRID Scribe

CHECK PHONE MESSAGES QUICKLY AND EASILY WITHOUT DIALING IN

ShoreTel Connect HYBRID Scribe is a robust example of unified messaging, as it provides cross-platform functionality that adds efficiency and convenience to every user—from the cloud.

ShoreTel Connect HYBRID Scribe is available to ShoreTel Connect ONSITE systems via the ShoreTel Connect HYBRID platform and gives onsite systems the benefits of this integrated scribe service for a simple monthly fee.

The ShoreTel Connect HYBRID Scribe service transcribes voice messages received by a ShoreTel phone system user and sends the text, along with a WAV file, to a specified e-mail address.

ShoreTel Connect HYBRID Scribe enables the ability to visually review voice mail and save the text file for archival purposes. Caller information is provided as part of the transcription process, and the audio file is attached to the email as a WAV file for playback.

ShoreTel Connect HYBRID Scribe features

- Receive and read voicemail on mobile phones, compatible portable devices and/or email.
- Connect HYBRID Scribe makes searching for voice messages as easy as searching for an email.
- Important numbers, names and addresses are easy to find, easy to access and easy to archive.

ShoreTel Connect HYBRID Scribe requirements

Connect HYBRID Scribe requires the following for user activation:

- Email address: POP3, IMAP
- ShoreTel Voicemail account
- Sound card to support .wav files

BENEFITS

- Access voice mail in the way most convenient for you
- Search voice message content by searching your email for key words, caller names, dates, etc.
- Forward message content to others quickly and easily
- Add message transcriptions to CRM applications for customer tracking
- Add productivity tools a la carte and on demand from the cloud

Give your ONSITE system the convenience of voicemail transcription from the cloud
